## Description

The MACD-14 reed switch is a close-differential, sub-miniature, normally open switch with a 14.00 mm long $\times 2.28 \mathrm{~mm}$ diameter ( $0.551^{\prime \prime} \times 0.090^{\prime \prime}$ ) glass envelope, capable of switching 200 Vdc at 10 W .

This reed switch is also available in a surface mount version, that is, MASM-14. It has a high insulation resistance of $10^{10}$ ohms minimum and contact resistance less than 100 milli-ohms. Both reed switches are intended for use in applications that require low hysteresis between Pull-In and Drop-Out values.

## Features

- Low close/open hysteresis (close differential)
- Normally open switch

## Benefits

- Hermetically sealed switch contacts are not affected by and have no effect on their external environment
- Capable of switching 200 Vdc or 0.5 A at up to 10 W
- Zero operating power required for contact closure
- Excellent for switching microcontroller logic level loads

## Applications

- Position Sensing
- Industrial Controls
- Level Sensing
- Security

## Notes:

1. Contact rating - Product of the switching voltage and current should never exceed the wattage rating. Contact Littelfuse for additional load/life information.
2. When switching inductive and/or capacitive loads, the effects of transient voltages and/or currents should be considered. Refer to Application Notes AN108A and AN107 for details.
3. Electrical Load Life Expectancy - Contact Littelfuse with voltage and current values along with type of load.
4. Breakdown Voltage - per MIL-STD-202, Method 301.
5. Storage Temperature - Long time exposure at elevated temperature may degrade solderability of the leads.

Notes:

1. Operate (including bounce)/Release Time - per EIA/NARM RS-421-A,diode suppressed coil (Coil II).
2. Shock and Vibration - per EIA/NARM RS-421-A and MIL-STD-202.
3. Pull-In Range - Contact Littelfuse for narrower AT ranges available.
4. Rating Sensitivity - The value at which contact ratings and operating characteristics are determined. Derating may be required below this value.
5. Custom modifications of forming and/or cutting of reed switches are available. Please contact Littelfuse.
